

Dear IHA Member,

I am excited to announce IHA's newly endorsed business partner, Expansion Health, LLC, developers of the mobile patient payment app, HealthDollars. Expansion Health's team brings over 35 years of experience in developing engaging patient experiences through secure, HIPAA compliant, applications.

The HealthDollars mobile payment app helps patients pay, track and manage ALL of their medical bills in one place with the simple snap of a picture. I found it to be fast, simple and as easy to use as my Amazon account.

I believe the HealthDollars app brings IHA members a great opportunity to make solid progress toward meeting today's patient expectations of "one-click" experiences. The HealthDollars app delivers a number of strategic engagement benefits beyond getting paid faster and at less cost.

I urge you to take advantage of this partnership and reach out to the Expansion Health team as implementing HealthDollars is far easier than you may expect. The app requires NO systems integration or changes to existing payment workflows.

To learn more about how the HealthDollars app can become an asset for your organization, visit healthdollars.com or visit Expansion Health's member-only site at ihaconnect.org.

Sincerely,

A handwritten signature in black ink, appearing to read "Doug Leonard", written over a light blue horizontal line.

Douglas J. Leonard, FACHE
IHA President
